# PROJECT MANAGER

## **Job Descriptions** (rev 03/2025)

---

Salary Range \$90k-\$125k annually

### **GENERAL FUNCTION:**

Under the general direction of the President, manages the construction and construction support processes within Black Label. As part of the project team, this position is involved from pre-construction through construction completion of all projects, with the support of staff in the field.

### **RESPONSIBILITIES:**

#### General Function:

- Communicating with Architects, project owners and their representatives throughout the sales, design, construction and warranty process
- Direct oversight, management and support of field construction staff
- Communicate and project the Black Label Custom Homes, "We care" attitude to all customers and employees through all forms of communication (writing, verbal, appearance)
- Hire, train, motivate and terminate when necessary, all construction personnel, including subcontractors. Hiring subs involves price negotiation, and an in-depth knowledge of construction and building code compliance
- Train all construction personnel in the principles of customer service, recognizing that "great" service often requires a "shocking level of response"

#### Project Management:

- Conducts pre-construction conferences with customers and subcontractors
- Project permitting and regulatory compliance
- Compose and oversee all construction schedules
- Identifying scopes of work for all trade partners and issuing subcontract agreements

**Black Label**  
CUSTOM HOMES

- Conducts quality inspections to ensure Black Label standards of construction and job site conditions are being adhered to on a continual basis
- Manage construction staff's resources, including budget
- Facilitate and negotiate company position with "hard to resolve" customer requests
- Responsible for ensuring execution and timely completion of outstanding service requests

#### Project Finance:

- Estimating, material takeoffs and buyout of all new construction projects
- Responsible for reviewing purchases and subcontractor invoicing, ensuring costs are getting coded appropriately
- Working in tandem with Accounting to ensure timely and accurate delivery of owner invoices
- Participating in project budget forecasting with Accounting
- Negotiate pricing with local trade contractors
- Build, review and approve project budgets

#### General Management

- Conducts weekly construction team meetings. The most important agenda items being resource scheduling, solving problems in the field and coordination for prompt warranty service
- Where necessary, has the authority to take disciplinary action for trade contractor's failure to perform
- Conducts quarterly personnel growth reviews for those who report to this position
- Attend and participate in regular meetings for all Black Label team members
- Serves as back up in Black Label staff absence
